

Balbun Technology has all the answers when it comes to weld cleaning and treating metals surfaces. We have been the undisputed world-leaders when it comes to **Conductive Brushes**. Our commitment to the Industry and continue **Research & Development** over the last 10 years, enable us to deliver the right brush to meet your needs.

We manufacture the **Largest Range** of Conductive Brushes in the **World**.

Because Balbun Technology is a true **OEM** organization, our base-knowledge in **materials & alloys** ensures that we provide you with the optimal Conductive Brush, so that you can complete your weld-cleans safely, cleanly and fast.

So if you are missing out because:

- **Your Weld-Cleaning brush is looking tired, or**
- **Your brush looks like a mop, or**
- **Your Weld-Cleaner & Brush are not up to the Job**

Then you need to step up to the **TekTig Technology**, our newest range of Conductive Brushes in combination with our exclusive **KSS Sliding-Shroud** can improve your Weld Cleaner by as much as **50%**. So if you need to improve your business, let Balbun Technology show you how.

The following Selection Guide lets you choose the right Conductive Brush:
